LEVELS OF CARE

Intensive Outpatient Program (IOP)

Designed to help individuals experiencing an increase in distressing symptoms and behaviors, or are not progressing in traditional outpatient services, IOP offers psychotherapeutic programming that is less intensive than a PHP program and creates a solid foundation before transitioning to community treatment. IOP meets 3 days a week 3 hours per day.

Partial Hospitalization Program (PHP)

PHP serves as a preventive program to hospitalization or as a solid bridge for those stepping down from hospitalizations or residential treatment programs. Offering access to intensive psychotherapeutic treatment and support, clients are able to participate in a structured therapeutic program during the day while living at home and enjoying their community in the evenings. PHP meets 5 days a week for 6 hours a day.
